"As a result, we remain confident in our ability to achieve our long-term growth objectives by leveraging the combined strength of our high-caliber management team, sound business strategies and brand-centric organization to benefit our shareholders, franchisees, hotel guests and associates."

Outlook for 2006

The company's fourth quarter 2006 diluted EPS is expected to be \$0.34. The company expects full year 2006 adjusted diluted EPS of \$1.47, which excludes the effect of the

reversal of provisions for certain income tax contingencies and the loss on extinguishment of debt described below. The company's full year 2006 diluted EPS is expected to be \$1.66. Earnings before interest, taxes, depreciation and amortization ("EBITDA") is expected to be \$175 million. These estimates include the following assumptions.

- \* The company expects net domestic unit growth of approximately 4% in 2006:
- \* RevPAR is expected to increase 4.5% for fourth quarter 2006 and 5.5% for full-year 2006;
- \* The effective royalty rate is expected to increase 2 basis points for full-year 2006;
- \* All figures assume the existing share count, include stock-based compensation expense and assume an effective tax rate of 36.5% for fourth quarter 2006.

Adjusted Net Income and Diluted EPS

Net income and diluted earnings per share for the three and nine months ended September 30, 2006 include a reduction of income tax expense related to reversal of provisions for certain income tax contingencies of approximately \$12.8 million and \$12.6 million, respectively. Net income and diluted earnings per share for the nine months ended September 30, 2006 also include a loss of approximately \$0.3 million (\$0.2 million, net of the related tax effect) related to the extinguishment of debt. Those items represent diluted EPS of \$0.19, net, for the three and nine months ended September 30, 2006. Adjusted diluted EPS and adjusted net income for the three and nine months ended September 30, 2006 exclude these items.

Net income and diluted earnings per share for the three and nine months ended September 30, 2005 include additional income tax expense of approximately \$1.2 million related to the Company's plan to repatriate approximately \$23.5 million of foreign earnings pursuant to the American Jobs Creation Act and a reduction of income tax expense related to the resolution of certain tax contingencies of approximately \$4.9 million. Those items represent diluted EPS of \$0.05, net, for the three and nine months ended September 30, 2005. Adjusted diluted EPS and adjusted net income for the three and nine months ended September 30, 2005 exclude these items.

Use of Free Cash Flow

The company has consistently used its free cash flow (cash flow from operations less capital expenditures) generated from its operations to return value to shareholders. This is primarily achieved through share repurchases and dividends.

For the nine months ended September 30, 2006, the company paid \$25.5 million of cash dividends to shareholders. The annual dividend rate per common share was increased 15% by the Board of Directors in September and is now \$0.60.

The company has authorization to purchase up to an additional 5.1 million shares under the share repurchase program. Repurchases will continue to be made in the open market and through privately negotiated transactions subject to market and other conditions. No minimum number of shares has been fixed. Since Choice announced its stock repurchase program on June 25, 1998, the company has repurchased 33.6 million shares of its common stock for a total cost of \$711.9 million through October 30, 2006. Considering the effect of a two-for-one stock split in October 2005, the company has repurchased 66.6 million shares at an average price of \$10.69 per share.

The company expects to continue to return value to its shareholders through a combination of share repurchases and dividends, subject to market and other conditions.
